16-Point Grid Design System

Our design system is built upon a 16-point grid; meaning the core measurement is 1rem (1 root em) = 16px font height. Nearly all spacing between objects is a simple 1rem or 2rem, and all aspects of component construction derive from rational fractions of 1rem, or 16px.

16px = 1rem

html {font-size: 16px};

<https://zellwk.com/blog/rem-vs-em/>

Artboard Sizes

Our layouts are based upon a common screen width of 1280px. Divided by 16px (1rem), an entire layout as shown is 80rem wide. Diagrams (in red) are assumed in measurements of rem unless otherwise noted.

The main content area of our designs uses a 12-column layout based on the Bootstrap framework, with minor modifications to complement the 16-point grid (specified, right).

- 1 column = 4rem = 64px
- 1 gutter = 2rem = 32px (1rem each side of column)
- 1 layout = 80rem = 1280px, default height 720px
- main content area = 1120px = 70rem

2 Colors

The below colors constitute the entire palette of our interface designs and components. Note that many use default Bootstrap nomenclature, and will be referenced as SCSS variables throughout this document.

	Black #141414 Text, modal overlays, SCSS color shades (darker)		White #FFFFFF Reversed text, SCSS color tints (lighter)
	Primary #37628E Primary interface elements/actions		Secondary #9A9994 Secondary interface elements/actions
	Info #33AEE8 More info, external functions, changed fields		Danger #CB439F Validation, errors, deletions
	Selection #1C8575 Identifies which items in a group are selected		Warning #EC7E43 Warnings, callouts
	Success #8DC143 Add, new, etc. functions		Yellow #FFC107 Branding accent
